Sword Group launches operation in Bermuda

Bermuda to complement the Group's insurance offering internationally

Bermuda, Hamilton, 11 July 2008 Sword Group (NYSE Euronext: FR0004180578 SWP) Sword the International IT Group, announced today the opening of an office in Bermuda to support the increasing demand for their innovative insurance software solutions. The new Bermudian office will closely support and work with Sword's already successful New York insurance operation.

In today's business climate, changing market conditions and the need to control expenses, is driving the demand for flexible core and e-business systems. Carriers, particularly P&C carriers, are looking for systems that can be configured - rather than coded - to suit specific business processes, reduce time to market with new products, whilst at the same time improving auditability and compliance – all key benefits provided by Sword's insurance applications.

Sword is already working with over 7 carriers on the island and by opening an office on the island Sword can better satisfy their current needs. Having a local presence will also enable Sword to anticipate and identify their future requirements.

The new operation will be headed up by Stuart Browes, who brings a wealth of experience and market knowledge, with 4 years personal and commercial lines broking, 6 years underwriting & operational management (AGF & Allianz) and 4 years business process re-engineering and consultancy.

Sword Group launches operation in Bermuda/

continued

Tony Holland Sword's Chief Operating Officer is delighted, "In addition to his experience, Stuart is a highly qualified and talented individual. He is an Associate of the Chartered Insurance Institute (ACII), a Chartered Insurance Practitioner (Chartered Status), a member of the Society of Technicians in Insurance (MSTI) and a member of the Project Managers Institute (PMI). With these talents Stuart is the perfect man for growing our presence in Bermuda." Sword's integrated insurance and reinsurance solutions "OPEN CO+" and "Open Xposure" provide accurate, up-to-date land-based and/or offshore aggregations for underwriters. These applications combine the latest business process management technologies with proven insurance functionality with the ability to configure insurance products specific to customers' business processes, as well as lines of business they want to write.

Notes to Editor
