

Microsoft SharePoint Knowledge Sharing Workshop for NHS

Exploit Existing SharePoint Investment to Drive Value and reduce cost

Sword Group's Consulting practice, in conjunction with Microsoft, and a leading NHS Trust is hosting a free interactive workshop at its London offices to explore how Trusts can leverage the existing investment already made in Microsoft SharePoint licensing and enterprise agreements to drive down costs and improve compliance and performance.

Sword's Healthcare specialists will share their knowledge and experiences of SharePoint and how NHS Trusts can benefit from improved collaboration and communication, reduced operating costs and adherence to new and evolving compliance directives such as CQC.

Microsoft's NHS Industry Manager will share their vision for the NHS and discuss how they work with Trusts to help improve how Healthcare is delivered to all citizens across the country.

Charlie Helps, Company Secretary and Head of Information Governance for **Avon & Wilts Mental Health Partnership NHS Trust** will outline the value of SharePoint in using structured data to support effective governance.

This event is aimed at business and technology professionals looking to exploit the power and potential of the existing SharePoint investment within the NHS to deliver business value, reduce costs and help comply with regulations. This interactive workshop is a great opportunity to participate and network with Microsoft, a leading Healthcare focused SI and your peers in an informal environment.
