

Subsurface Data Management

PUTTING TRUSTED DATA AT THE FINGERTIPS OF GEOSCIENTISTS

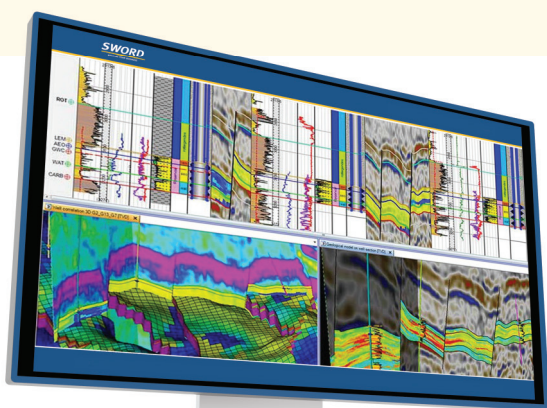

Realise the potential of your subsurface data

Leading the way in Subsurface Data Management (SDM), we specialise in managing subsurface data throughout its entire lifecycle, from acquisition to divestment, ensuring that trusted and valuable data are at the fingertips of the interpretation community.

Our expert teams offer comprehensive end-to-end data solutions across the subsurface and wells domains. Whether you need customised projects, on-demand support, or complete managed services, we have the geoscience knowledge and talent pool to meet your needs.

Reduce technical uncertainty and improve your decision-making

- **Managed Data Services:** Subsurface professionals can spend more time on value-add, interpretation and engaging with their business to drive collaborative decision-making. Tailored to your demands, our fully governed onsite and offsite services put you in control, providing the flexibility and reliability you require, reducing costs by focussing your resources on core activities.
- **Current State Assessments:** With 30+ years of experience, Sword assists energy companies in defining their "desired future state" through a field-proven CSA, supported by deep domain expertise, resulting in a tangible roadmap for sustainable data management.
- **Data Workflow Automation:** With Sword's cutting-edge data analysis and optimisation services, we accelerate the automation of your day-to-day subsurface data management. Gain access to in-depth insights, robust metrics reporting, and advanced analysis capabilities to uncover automation opportunities and streamline your operations.
- **Data Migration and OSDU Support:** Seamlessly transition to standardised, rationalised, and aligned data systems that meet industry, legal, and company requirements. Benefit from the support and advice garnered from Sword's industry-wide OSDU involvement.

The Sword advantage

Being able to harness the full range of Sword's resources, technology, and business capabilities. We provide key SDM services in drilling, production, engineering, and corporate domains. As active participants of PPDM, SPDM and OSDU we are helping to steer our industry towards a sustainable future.

With 30 years' experience across 20 energy companies, Sword is uniquely positioned to support your SDM requirements

SWORD

UPGRADE YOUR BUSINESS
